

Console Profile

TechVision is our leading-edge console solution

This is our flagship console platform for discriminating customers who require state-of-the-art furniture appearance and functionality. TechVision can be designed for dedicated operator positions or in flowing, shared user configurations. Endless design and component choices enable users, contractors and specifiers to create enclosed or open consoles with flat panel arrays properly configured for excellent focal and viewing distances, curved communal desktop space and integrated personal storage modules. With our proprietary VisionMount™ technology, or motorized lift surfaces, you can upgrade a TechVision console to a sophisticated ergonomic solution that exceeds prevailing ergonomic standards and provides unparalleled operator efficiency and comfort.

Curved console design features protective urethane edge treatment with sit-to-stand adjustment and our innovative VisionMount flat panel array system

Sweeping console configuration provides a parabolic arrangement of monitor technology with personal environmental controls

Cluster of three consoles illustrates our customization capabilities and ergonomic upgrades for sit-to-stand surface operation and adjustable flat panel arms
